

Residential schemes in London involving historic buildings

Project Outline

DPP Heritage successfully promoted the refurbishment and alteration of a number of prestigious listed buildings in the prime residential districts of London, working alongside a number of planning consultants and architectural practices.

In conservation areas we have secured the replacement of buildings with bespoke contemporary dwellings which will enhance the character of the areas.

The listed building work has encapsulated a range of proposals including roof and infill extensions, sensitive alterations to plan form, the provision of lifts and the restoration and repair of decorative schemes.

Services Provided

The provision of specialist advice regarding the special interest of listed domestic buildings to assist in the evolution of proposals, supported by bespoke Heritage or PPG15 Statements to accompany the necessary applications.

Promotion of the proposals and negotiation with the statutory authorities to secure successful decisions.
